

# Managed 5G Wireless Broadband Internet

The Next Generation in High Performance  
Wireless Connectivity

# Managed 5G Wireless Broadband Internet

As part of our Managed Internet suite, Managed Wireless Broadband is deployed, managed and maintained by our network specialists 24/7/365, offloading all your IT network responsibilities to us! 100% backed by our own nationwide, private, PCI/HIPAA compliant backbone, assuring high-performance and trusted solutions.

Our 5G Wireless Broadband is a fully managed, wireless internet access solution designed for small business or enterprise branch locations who want to take advantage of future-proofed, next generation wireless technologies with maximum performance and uptime.

From remote offices to under-served areas, our competitively priced 5G Wireless Broadband service is perfect for:

- ⦿ Locations where quality fiber or cable connections are not available
- ⦿ Events or kiosks, providing connectivity that is flexible to use
- ⦿ Business looking to keep critical applications like Point-of-Sale (POS), voice, or security online
- ⦿ Large enterprise looking to provide alternative connectivity through SD-WAN

## Need 4G LTE Failover?

Our 4G Backup solution connects to a Sangoma managed router to deliver Internet backup or failover for business continuity if your company's primary circuit goes down.

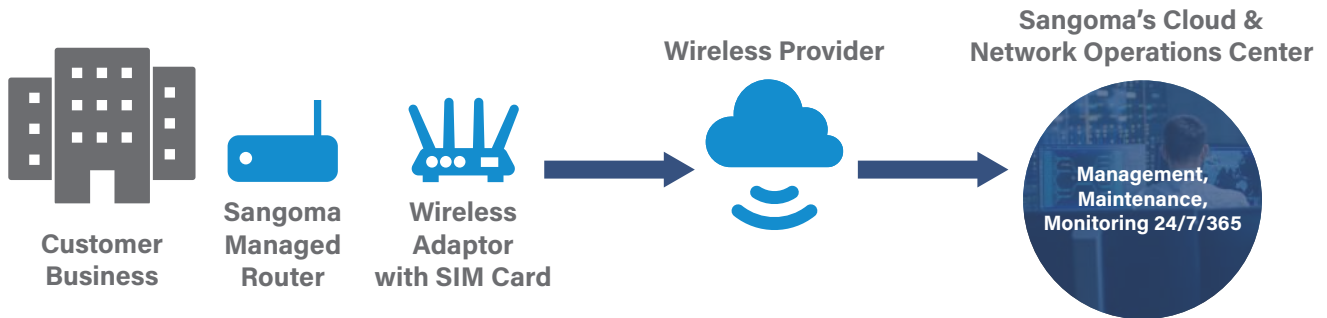

- ⦿ 1GB of pooled 4G LTE Data
- ⦿ Your choice of 8Mbps or Full LTE download speeds
- ⦿ SIM card + wireless adapter
- ⦿ Managed router

# Available Plans

Our nationwide backbone enables us to deliver you a curated menu of plan options, based on your area, to fit your connectivity requirements.

|  |  |  |
|--|--|--|
| Download Speeds<br>Up to 650 Mbps+                                 | Data Options from<br>50GB -> Unlimited     | Pooled/Unpooled<br>Options from All Major<br>US Carriers |
| Mix/Match Plans that<br>Best Suits Your Needs<br>Based On Location | Static Public IP<br>Address Included       | SIM Card +<br>Wireless Adapter                           |
