- » Sangoma Connect

PROFESSIONAL SERVICES

- » Project Planning & Management
- » Relocation Solution
- » Maintenance Program

KEY BENEFITS

- » Seamless Communication across buildings
- » Superior Voice Quality
- » Cost efficiency
- » Hybrid Workspace

The Challenge

After acquiring a new yard and expanding their business, the client was in need of a UC solution provider to connect their communications across 3 buildings. They needed to scale their system quickly and relocate telco services while coordinating with various contractors and partners to introduce the Sangoma PBXact 400 Unified Communication System. The hybrid system has the capacity to support over 100 users working from anywhere (WFA) through the UCaaS capabilities.

Winning Strategy

- Hyper Communications' ability to meet strict timelines.
- Ability to meet the demands from the company.
- Ability to work well with other third parties involved in the project.
