- » Infrastructure Setup
- » Maintenance Program

KEY BENEFITS

- » Cost Efficiency
- » Dependable Connection
- » Optimum Voice Transmission
- » Facilitate future users-expansion

The Challenge

SCI made a decision to move into a Cloud-based Communication Solution in order to remove in-house hosting and management of the existing one. As manpower and the business operating environment became more challenging, digital transformation was needed to remove unnecessary operational costs and complications.

Winning Strategy

- With strong reference and engagement with Telco Singtel, Hypercom was able to successfully deploy a full Cloud-based UC Solution. Cloud hosting is trending as some organizations would rather go for a hassle-free subscription-based model.
