

Voice For Microsoft Teams

Leading Voice & Collaboration Solutions

Empower your business with communications and collaboration powered by Sangoma Voice for Microsoft Teams. Optimize productivity with seamless calling from within the Microsoft Teams application using Sangoma's cloud based, direct routing integration with the Microsoft Teams platform.

Key Features & Benefits

Diversify Your Digital Infrastructure

Connect with colleagues and customers using Sangoma voice integrated with Microsoft Teams. Sangoma's Microsoft Teams integration empowers you with more streamlined capabilities and reduced TCO using your existing investment.

Streamline Your Operations

Access your mission-critical communications, files, and data from anywhere using any device. Your existing phone numbers and call routing will perform as designed with a seamless cloud-based direct routing integration between your business phone system and Microsoft Teams.

Easy Implementation

Getting started with Sangoma Voice for Microsoft Teams is simple! This integration comes included with Switchvox Cloud upon request or with Sangoma's Professional Bundle for Microsoft Teams and can be leveraged on any PC, Mac, or mobile device.

Available on Business Voice, Business Voice+, and Switchvox Cloud

Requires Microsoft 365 or Office 365 licenses, plus the Phone Service Add-on where applicable
